THE NEW JEFFERSON HOSPITAL  
OPENED JUNE, 1907

1913	
Accidents,	9,900
Admissions,	6,507
Dispensary, new cases,	24,834

REPORT  
OF THE  
JEFFERSON HOSPITAL

For year ending May 31, 1913

Thirty-sixth Year

PHILADELPHIA

1913

The JEFFERSON HOSPITAL receives the injured and sick irrespective of race, nationality or religion.

Patients desiring admission should apply at the Hospital between 8 A. M. and 5 P. M., or to any member of the Medical Staff.

Cases of recent accident occurring in Pennsylvania are admitted at any hour of the day or night.

The insane, and patients suffering from contagious diseases or alcoholism are not received; except when temporary relief is possible, incurable cases are not admitted.

The Maternity Department is located at 224 West Washington Square. Women are received and cared for during confinement, or attended at their homes.

The Department for Diseases of the Chest is located at 236 and 238 Pine Street. Patients with advanced pulmonary tuberculosis only are admitted to the wards.

#### Anesthetists

H. M. RIGHTER, M.D., J. F. X. JONES, M.D.

#### Registrar

H. LEOPOLD.

#### Assistant in Charge of Surgical Diseases of the Mouth

W. J. ROE, M.D.

### DIVISION B

Tuesday, Thursday, Saturday  
12 o'clock, noon.

#### Attending Surgeon

PROF. JOHN H. GIBBON, M.D.,

#### Chief Clinical Assistant

DUNCAN L. DESPARD, M.D.

#### Clinical Assistants

E. G. ALEXANDER, M.D., ERNEST G. MAIER, M.D.,  
LOUIS CHODOFF, M.D., RANDALL MacCARROLL, M.D.,  
JOHN J. WILEY, M.D., LESLIE F. MULFORD, M.D.,  
HARRY L. MERSCHER, M.D.

#### Anesthetists

ERNEST G. MAIER, M.D. LOUIS CHODOFF, M.D.

### DIVISION C

Daily, 5 P. M.

#### Attending Surgeon

PROF. FRANCIS T. STEWART, M.D.

#### Chief Clinical Assistant

E. J. KLOPP, M.D.

#### Clinical Assistants

CLARENCE D. SMITH, M.D., HENRY L. BERNARDY, M.D.,  
WILLIAM SWARTLY, M.D., JOHN L. DONAHUE, M.D.

#### Anesthetist

CLARENCE D. SMITH, M.D.

## SURGICAL DISEASES OF THE RECTUM

#### Assistant Proctologist

J. COLES BRICK, M.D.

#### Clinical Assistant

JESSE HALL ALLEN, M.D.

# The Year's Work

## A SUMMARY

Patients treated, 6,507

The Maternity has administered to 1,080 women ; 799 babies

Emergency Ward, 9,900 patients ; 13,638 visits

Dispensaries, 24,834 patients ; 107,947 visits

Prescriptions filled in Dispensary Drug Stores, 31,054

In all public departments, 40,979 patients

Average patients per day in all public departments, 601

ONE OF THE SURGICAL WARDS

# The Jefferson Hospital

## In the Early Days

Eighty-eight years ago, when the Jefferson Medical College was founded (1825), it is recorded that a modest dispensary service was established in connection with the institution (May, 1825). "In those days a few patients came for advice and treatment. No doubt a room or possibly rooms were set aside for such purpose. Patients were operated on by distinguished surgeons connected with the College, and persons not able to reach their residences in other ways were taken home in the doctor's trap." The first step toward a hospital was taken about the year 1843. Living graduates remember that, long before the Civil War, facilities for the care of a small number of patients were offered by the institution. Medical students acted as volunteer nurses and attendants, without pay. Food was obtained from a nearby restaurant or brought to the patients from the kitchens of the attending surgeons. The bed space was very limited, and tradition holds that at one time space was available for not more than two patients. Later, as the classes of the Jefferson Medical College grew in numbers, and as a result of the stress which the early teachers placed upon bedside instruction and clinical teaching, the number of beds was increased. At first ten, and then later, twenty patients were housed, often on cots of the most temporary kind, and in quarters having no semblance to what could now be called a hospital.

In those days few medical colleges made pretext of any bed service, and none offered anything materially better. From its earliest inception the teachers of the institution had emphasized practical bedside instruction in the training and teaching of young doctors and as the classes grew in size, the college authorities felt yearly the increasing need of adequate hospital facilities. About the year 1870 the initial steps toward the construction of a modern fully equipped

hospital were taken. Various plans for financing the new hospital were discussed. The institution was without money, and yet the urgency of the need of the hospital demanded action. In 1872 the Alumni Association of the College pledged \$15,000 on the condition that additional funds were secured; these ultimately became available, and on November 4, 1875, a contract for the new building was executed.

### **The First Hospital**

On May 1, 1877, the first patient was admitted to the first hospital of the Jefferson Medical College: the structure which now stands on Sansom Street between Tenth and Eleventh, and known as the Nurses' Home. This institution, at the time of its opening, was considered one of the most modern of its kind. The construction of this hospital cost about \$125,000, its equipment \$9,052.94, and it offered accommodations for 125 patients. During the first year 441 patients were admitted. Situated in the very heart of the city, the hospital early demonstrated its value to the community. The injured workmen in the many nearby industrial establishments; the pedestrians accidentally hurt on the crowded streets of the city's business centre; the victims of accidents incident to various building operations, etc., were hurried by patrol and ambulance to the hospital so conveniently located. Not only the victims of accidents, but the poor of the adjacent city slums, and even the poor of the distant parts of the city, came for medical advice and oftentimes hospital bed care.

For thirty years the institution continued to grow in influence and in the amount of work accomplished. In this period approximately 5,000 doctors were trained in its halls, 50,000 accident cases were treated, and its staff had given 2,000,000 consultations to patients applying for relief. During the last year of its occupancy (1906), 2,268 patients were admitted. The ever increasing demand for more beds, the increase in the dispensary service, and the rapid progress in modern building construction, gradually made evident the necessity for the replacement of the once modern, but now dark, gloomy and inflammable institution by a new, capacious, fire-

ROOF-GARDEN FOR PRIVATE PATIENTS

proof, sunny and well-ventilated structure. A new hospital was urgently needed. The removal of the College Building, with the purchase of adjacent properties, made possible the utilization of the old site for the new hospital. In 1903 the construction of the new building was started, and after numerous unavoidable delays the present new building was formally opened on June 8, 1907.

### **The New Hospital**

The present report closes the sixth year in the new Jefferson Hospital. It is gratifying to note that in each succeeding year since the opening, the number of patients entering the new hospital has increased. During the first year (ending May 31, 1908), 3,559 patients were admitted; in the second year, 4,847 patients; in the third year, 5,425 patients; in the fourth year, 5,729 patients; in the fifth year, 6,010 patients, and during the last year, 6,507 patients were admitted to the hospital. During the last year of occupancy (1907) of the old hospital, 2,268 patients were admitted; during the last year (1913) of the new hospital, 6,507 patients were admitted; an increase of almost three to one in six years. The new building with its modern and extensive equipment has not only facilitated the care of the injured and sick, but has stimulated the best efforts of doctors and nurses.

During the past year the total days' treatment was 97,398 against 93,467 for 1912. Of this number, 65,588 were free days, an increase of 3,103 over last year; for 14,031 days beneficiaries made some contribution toward the expense of treatment. The total number of private patients treated during the year was 1,777; they spent 17,779 days in the hospital. OF THE PATIENTS ADMITTED TO THE WARDS OF THE JEFFERSON HOSPITAL, 82.3 PER CENT. WERE ABSOLUTELY FREE. The work of the Emergency Department has increased about 7 per cent. The average number treated in this department was 34.3 per day, as compared to 31.8 of preceding year. Every forty-five minutes, day and night, some accident or emergency brought to the door an applicant for relief.

In the dispensary 24,834 patients were admitted during the year as compared to 24,454 patients the preceding year. These patients made 107,947 visits or an average of 4.3 visits per patient. The drug store filled 31,054 prescriptions for dispensary patients.

### **Provisions for the Professional Care of Patients**

The fourteen departments of the Jefferson Hospital, including the dispensaries, are under the immediate supervision of 22 members of the Visiting Staff and over 100 assistants. The Resident Staff comprises 14 physicians, including a Chief Resident Physician, all of whom are on continuous service in the hospital. Nursing is supplied by a Directress of the Training School, Assistant Directress, 13 graduate nurses and 97 pupil nurses; 130 persons give their exclusive time to the professional care of patients in the wards and dispensaries. The institution maintains two fully equipped drug stores supervised by a Registered Apothecary Manager and three Qualified Assistants who reside in the Hospital. The magnitude of this service may be appreciated when it is stated that, aside from the house and operating room service, 31,054 prescriptions were filled last year.

### **Location and Facilities**

The Jefferson Hospital, located at Tenth and Sansom Streets, is in the midst of a busy industrial and shopping district, surrounded by streets which, during many hours of the day, are thronged with people of all callings and crowded by burdened traffic. Within this district are located many large stores, hotels and theatres, printing establishments, factories and other industries, employing thousands of workers. With such environment a properly equipped hospital, in a condition of constant preparedness, best fulfills the requirements of an emergency institution. Beyond the business and industrial area, extending in practically all directions, are residences, apartment houses and the dwellings of the poor, to the occupants of which a hospital is the

surest, safest and most expeditious source of relief in any emergency.

To the deserving poor of the State of Pennsylvania the facilities of the Jefferson Hospital are free. Patients, often desperately ill, are received from distant towns and hamlets and, when necessary, are met at railroad stations by an ambulance, attending physician and nurse.

### **Ambulances**

The Jefferson Hospital maintains two automobile ambulances which respond to calls received from every section of the city and suburbs. Patients coming from a distance are met at the railway station and conducted speedily to the hospital. The frequent and long suburban calls made necessary the purchase during the past year of a new gasoline ambulance at a cost of nearly \$3,000.

### **The Maternity Department**

Elsewhere (p. 35) will be found a full report of the Maternity Department of the Jefferson Hospital. During the year 1,879 patients (mothers and children) were given assistance. The present quarters, located at 224 South Seventh Street, are totally inadequate to meet the demands of patients for admission to the hospital. The department is accomplishing a great good under difficulties incident to crowding and insufficient space. It is sincerely hoped that some benefactor, seeking an avenue through which he may do a great service to suffering humanity, may supply funds necessary to the construction and endowment of a modern, fully equipped department.

### **Indebtedness**

A fair valuation of the Jefferson Hospital and Nurses' Home, making due allowance for structural depreciation, and also of enhancing value of site, and including equipment, would exceed \$2,000,000. Upon this is a mortgage of \$385,000, the interest on which constitutes a fixed charge

definitely absorbing something of our resources. It is confidently believed that some benefactor will relieve us in whole or in part of this burden, so that the institution may be free from debt and render available for maintenance and extension money now required for the payment of interest. Those charitably inclined should investigate for themselves the scope, the economies and the thoroughness of the work done in all departments and find therein a convincing reason and an appeal for generous giving.

### **Extension of the Charitable Work of the Hospital**

During the past year the Trustees authorized the inauguration of two new departments which are solely charitable in character, namely, the Social Service Department and the Department for the Care of Patients with Tuberculosis.

#### **The Social Service Department**

The Social Service Department of the Jefferson Hospital was organized April 15, 1912. Its organization was made possible by a fund contributed by Miss Anne Hinchman and a number of her friends. The initial contributions were followed by others from time to time which have insured not only a continuance of the work, but an increase in its scope. Although the trustees have entire supervision of the activities of the department, the Women's Auxiliary, through its Social Service Committee, has supported and managed the work with enthusiasm. The various members have contributed generously themselves, have interested others and have provided for its expansion, until at the present time there are three paid workers and a stenographer engaged, and in addition a number of medical students are doing volunteer work.

Hospital Social Service is charitable work of the highest order. It seeks to combine with the medical or surgical care of the patient a consideration of his environment. In the case of the dispensary patient, visits are made to the home by the Social Worker and the conditions found there reported

ONE OF THE DISPENSARIES (SURGICAL)

During the year 24,834 new patients were admitted to the Dispensary. These patients made

to the dispensary physician. This follow-up work, as it is called, not only insures the carrying out of the doctor's directions, but frequently elicits important factors in the causes and spread of disease. In the case of the ward patient, an investigation is made into the home conditions, and if perchance the enforced hospital stay means the removal of the sole financial support of a family, a problem is presented which the Social Worker endeavors to meet. Temporary aid, secured through charitable organizations or by interesting the employer, the church or relatives, is the result. If perchance, following his hospital stay, the patient is unable to resume his usual occupation at once, convalescent care is obtained in the country and a lighter occupation secured. This is but a single phase of the varied sociological activities of this department, activities which augment the efficiency of medical care by the investigation and treatment of sociological abnormalities. The illegitimate mother, the intemperate father, the wayward child, the wage-earner handicapped as the result of an injury, the attempted suicide, the mentally unfit, the aged and infirm, the ill-nourished child in the home, the convalescent from a serious illness, the patient who became ill because of unhygienic surroundings, the blind, the deaf and the halt are readjusted to their environment, with the result that the sum total of unhappiness and helplessness is reduced, the maximum of happiness and usefulness compatible with such conditions, restored—and this is charity—this is the work our Social Service Department is accomplishing.

The hospital is desirous of widening the application of social service in its various departments. Its work is limited by lack of funds, and during the coming year it is earnestly hoped that the charitably inclined who read this paragraph may contribute toward its maintenance.

During the past year 1038 cases were referred to the social service workers for investigation, representing in most instances, a family problem of some sort or other; 3,078 visits were made to patients' homes; and the coöperation of 77 different charitable agencies secured in the handling of the various problems involved.

## **Department for Diseases of the Chest**

The new Department for Diseases of the Chest was acquired by the purchase of the buildings formerly occupied by the Phipps Institute and located at 236-238 Pine Street. These buildings have, at a cost of over \$20,000, been completely renovated and modernized and every facility afforded for the efficient care of patients suffering with diseases of the chest. In the new department ample space has been set apart for dispensary work, where all cases of chest disease are treated, while in the wards provision has been made for forty beds, which for the present will be devoted to the care of those suffering with advanced pulmonary tuberculosis.

An important part of the work consists in an extension of the existing Social Service Department of the General Hospital in order to study the home conditions of patients. It has for its object the promulgation of those methods necessary to prevent the spread of tuberculosis. In the families of patients suffering with the disease, directions are given to secure the health of those not yet victims. Incipient cases are studied with the view to arresting the progress of the disease; arrested cases are instructed in the manner of life to prevent relapses, and advanced cases are segregated in the hospital to eliminate the constant sources of the spread of the disease. The work of this department is destined to become an important phase of the charitable activity of the Jefferson Hospital.

## **An Appeal**

Attention has already been called (p. 23) to a mortgage, the interest upon which constitutes a large drain on the resources of the institution. It is hoped that friends of the Hospital and Alumni of the College will coöperate in securing contributions and bequests for paying off this debt. The new Department for Diseases of the Chest will cost \$20,000 to \$25,000 yearly to maintain. This new phase of the charity will appeal to many.

The Maternity Department is doing splendid work under

great disadvantage and is sadly in need of a new building. It is hoped that funds for this will be forthcoming so that the important work of this department may be extended to meet the demands of the many patients who seek admission, but who must now be turned away because of overcrowding. Many gave generously to the new hospital and it is confidently hoped that the urgently needed addition will receive equally generous support.

# The Women's Auxiliary

MRS. CHARLES M. LEA, *Chairman.*

MRS. HOBART A. HARE, *Vice-Chairman.*

MRS. PHILIPPUS W. MILLER, *Secretary.*

MRS. FRANK S. EVANS, *Treasurer.*

The Women's Auxiliary comprises three general committees\*—Hospital Committee, Maternity Committee and Nurses' Home Committee. The Report of the Maternity Committee is included in that of the Maternity Department, beginning on page 35. The following reports have been submitted by the treasurer and chairmen of the respective sub-committees.

## Hospital Committee

MRS. ROBERT E. HARE, *Chairman.*

This committee is especially devoted to the welfare of the general hospital. The many details are entrusted to sub-committees, the members of which give personal attention to the public wards and roof-gardens, the children's ward, and to the private rooms.

## Sub-Committee on Public Wards

MRS. B. DOBSON ALTEMUS, *Chairman.*

MRS. WALTER D. BLABON,

MRS. HOBART A. HARE,

MRS. J. CHALMERS DA COSTA,

MRS. FRANK G. KENNEDY, JR.,

MRS. FRANK S. EVANS,

MRS. DAVID LEWIS,

MRS. HORATIO G. LLOYD.

The wards have been visited as usual and clothing, ice cream, flowers and magazines have been provided.

Christmas and Easter were made pleasant for those unfortunate enough to be ill at these seasons. A sufficient sum was supplied in order to purchase gifts for the ward patients and employees. Appropriate flowers, wreaths and trees were placed throughout the house and every energy was directed toward bringing sunshine and cheer to our charges. Potted plants have been kept in the halls, corridors and reception

---

\* List of officers and members of the Women's Auxiliary, and the general committees will be found on pages 5 and 6.

A SECTION OF THE CHILDREN'S WARD

halls. These have been replaced by fern stands for which the sum of two hundred and forty dollars was donated.

The roof-gardens were again placed in order and made cheerful for the ill and depressed. Flowers and plants were supplied and all the furniture was repainted.

For the semi-public wards six covered bedside tables, six rocking chairs and six clothes trees were purchased, making these rooms much more attractive. The pneumonia roof-gardens were replanted and six rocking chairs purchased. Two rugs and six candle shades were supplied the private floors. During the year, 6,507 patients were admitted to the hospital, representing an increase of 497 over the previous year. The death rate is about the same for the two periods—very low.

It gives me great pleasure to report that Miss Anna J. Magee, a member of our Auxiliary, donated the sum of five hundred dollars to the new Department for Diseases of the Chest, located at 236-238 Pine Street, in memory of her mother, the money to be used in purchasing furniture for the Nurses' Home at that place. The following articles have been purchased: Twelve mahogany chairs, twelve mahogany bureaus, twelve mahogany rockers, twelve mahogany tables, one mahogany sideboard, one mahogany serving table, one large wicker sofa, four rockers and four side chairs, one table and chintz for cushions and curtains.

### **Sub-Committee on Children's Ward**

MRS. HOWARD A. DAVIS, *Chairman*.

MRS. SIMON GRATZ, *Vice-Chairman*.

MRS. B. DOBSON ALTEMUS,

MRS. DANIEL BAUGH,

MRS. HOWARD A. DAVIS,

MRS. E. E. GRAHAM,

MRS. ROBERT E. HARE,

MRS. D. L. HEBARD,

MRS. CHARLES M. LEA,

MRS. GEORGE H. LEA,

MRS. LUCIUS S. LANDRETH,

MRS. ALBA B. JOHNSON,

MRS. JOHN H. MCFADDEN,

MISS ANNA J. MAGEE,

MRS. PHILIPPUS W. MILLER,

MRS. FRANK SAMUEL,

MRS. ROLLIN H. WILBUR.

The present report closes another most prosperous year in the children's ward. During the summer months, June, July, August and September, ice-cream and wafers were

supplied, through contributions by various members of the Children's Ward Committee. Toys and a dozen and a half flower vases were sent, also flowers and fruit.

Grilles of galvanized iron were placed around the roof-garden, affording great protection to the children.

### **Sub-Committee on Private Rooms**

MRS. ROLLIN H. WILBUR, *Chairman*.

MRS. HOBART A. HARE, *Vice-Chairman*.

MRS. HOWARD F. HANSELL.

Various pleasant reports have lately reached us concerning the private rooms, to the effect that their service and appointments were very satisfactory; while the meals were good and daintily served and the nurses attentive and interested. All of this is surely gratifying when we bear in mind the many difficulties encountered by the hospital authorities in their effort to maintain a high standard of efficiency and service.

During the year the committee purchased thirty-six new couch covers, seventy-two bureau scarfs and a like number of stand covers, fifty summer rugs, thermos bottles, foot stools and papier machè vases. A number of small glass vases were donated. Mr. Mogridge, of Mertztown, most kindly gave ten summer rugs of attractive design, which were much appreciated. He was sincerely thanked by the Hospital Committee of the Auxiliary and the Private Room Committee.

Anyone who happens in the diet-kitchen at almost any hour is sure to be pleased with the appetizing viands in preparation, and should he follow one of the dainty trays to its destination, he would find a private room well equipped and up-to-date, which conditions all those interested in the Jefferson certainly try to effect, and the Committee for the Private Rooms is always on the lookout for improvements or suggestions of any kind. It is to be hoped that the Medical Director's suggestion of providing for the enclosure of the roof-garden, for winter use, can be sometime carried out, as it would be a most attractive feature. On Thanksgiving Day there were distributed to each private room small pots of ferns, and a holly wreath was sent to each on Christmas Day.

## **Sub-Committee on Social Service**

MRS. ALBA B. JOHNSON, *Chairman.*

MRS. FRANKLIN BAKER,	MRS. HOBART A. HARE,
MRS. DANIEL BAUGH,	MRS. DAVID LEWIS,
MRS. J. CHALMERS DA COSTA,	MRS. HORATIO G. LLOYD,
MRS. EDWARD A. DAVIS,	MRS. THOMAS McCRAE,
MRS. E. E. GRAHAM,	MRS. PHILIPPUS W. MILLER,

MRS. HOLLISTER STURGIS.

A most enthusiastic interest has been shown by the whole Auxiliary in the work of the Social Service Department, and a very generous response has been made to its appeals. Through this committee the salary of the assistant worker has been provided since the department was started in May, 1912. For some months a stenographer was employed for half time, but it was decided in October that, since records of cases are in this work of primary importance, and since so much time of the worker was taken up by merely manual labor, the committee should pledge itself for the support of a stenographer for full time.

The department has been very fortunate in securing the services of a trained worker, a nominal sum, merely, being contributed toward her support.

It must be left to others to tell of the value of Social Service in connection with the Jefferson Hospital, but we wish to record here our great appreciation of the services of Miss Pollock in starting the work and in extending its scope, so that the department now numbers, in addition to Miss Pollock as Head Worker, three trained assistants, the time of one being devoted entirely to work connected with the Department for Diseases of the Chest.

## **Nurses' Home Committee**

MRS. D. L. HEBARD, *Chairman.*

At Christmas gifts were given to all the undergraduate and head nurses, also the office force and telephone girls—a total of over 150 presents. The Home was decorated with laurel and holly and a large tree. At the request of the Directress of Nurses, a fund was raised to provide an entertainment for the nurses on Christmas Eve. The Directress

reported it had been a great aid in preventing homesickness. During the year the nurses' lecture room was supplied with eighteen new chairs, the library with stationery, magazines and the various current publications.

The Nurses' Commencement was held in May in the hospital amphitheatre. The class was small; nevertheless there were over four hundred guests present for whom refreshments were furnished. Through the kindness of Messrs. H. H. Battles and Messrs. Pennock-Meehan Co., the rooms were filled with cut flowers.

Miss Laughlin was given \$100 for the nurses' outing during the warm summer months. This fall our nurses will have the opportunity of a course of training at the new Department for Diseases of the Chest, 238 Pine Street. Through the generosity of Miss Anna J. Magee, the nurses' bed rooms, dining-room and parlors of this new department have been most comfortably furnished.

MRS. PHILIPPUS W. MILLER, *Secretary*.

### Report of the Treasurer

I herewith submit my report as Treasurer, for the year ending October 31, 1913.

To balance on hand November 1, 1912.....	\$873.74	
Cash from contributions .....	1,495.00	
Cash from Benefit at Bellevue .....	907.07	
Cash from dues and fines (dues, \$176.50; fines, \$9.75) .....	186.25

		\$3,062.30
Cash in Bank .....		\$423.06

Respectfully submitted,

MRS. FRANK S. EVANS, *Treasurer*.

Maternity Department

## **Annual Report of the Secretary of the Maternity Committee of the Women's Auxiliary of Jefferson College and Hospital**

Nine stated meetings were held during the year. The usual Christmas fund was provided for the Maternity by the Committee. In January the Trustees granted the Maternity an increase of ten dollars per week for running expenses. It was decided at the meeting in February that there should be regular standing committees of members of the Maternity Committee, a Visiting Committee, a Nursery-Maid Committee and a Dispensary Committee, the Visiting Committee to be on duty three months each. A Sewing Society met at Mrs. Paul Crompton's every Wednesday during Lent, where some of the necessary flannel and cotton slips for infants were made.

At the meeting in March it was resolved that the treasurer, Mrs. John M. Fisher, be asked to sell two bonds, the proceeds to be used for current expenses as required. (We were obliged to sell the bonds in order to have enough money to carry us through the summer.) Mr. Townsend, treasurer of the Board of Trustees, advanced the money, taking the bonds as collateral. A special appeal for donations of one dollar each was sent broadcast, and it was responded to by many kind friends of the Maternity.

During the summer the Maternity was taxed to more than its capacity. During May, 36 patients applied and only 17 could be admitted.

The Visiting Nurses had their usual summer holiday. The pleasure fund of \$25 was given to Miss Martin to use for the benefit of the nurses working at the Maternity during the summer.

A letter from the Jefferson Maternity Committee, signed by its chairman, has been sent to the Board of Trustees of Jefferson College and Hospital, stating to them that with great regret the committee cannot, after November 1, 1913, continue to carry the financial responsibilities of the Maternity, which they had been carrying for twenty-two years.

Nineteen hundred and thirteen has been a very busy year at the Maternity, as there have been very many complicated cases with the usual overcrowding of our limited space. If new quarters for the Maternity could be provided with sufficient moderate-priced private rooms, the Maternity Committee feels assured that much of the expense of that Department might be decreased, besides providing a sufficient number of cases for the students, in order that they may pass the State Board examinations, thereby giving under one roof all necessary instruction and doing away with the expense of the Dispensary. Each year shows an increase of demands for admission which cannot be gratified, as the old house is inadequate for the work of this important department, but notwithstanding the difficulties a great deal of good has been accomplished.

Our thanks are due to the Llanerch Branch of the Needlework Guild, the Philadelphia Branch of the Needlework Guild, the Ambler Branch of the Needlework Guild and the Philadelphia Branch of the National Plant, Fruit and Flower Guild.

MARY B. M. CORYELL,  
*Secretary.*

## **Medical Report of the Maternity Department Jefferson Hospital**

**For the Year Ending November 1, 1913**

**SITUATION OF THE MATERNITY DEPARTMENT.** The Maternity Department of the Jefferson Hospital (The Jefferson Maternity) is situated at 224 South Seventh Street, near the corner of Locust and Seventh Streets, on West Washington Square. Its telephones are: Bell, Walnut 494 and 495. The Jefferson Hospital ambulance answers its calls.

The Maternity is open day and night throughout the year to women who are pregnant and ill, or about to be confined, or suffering from the accidents and injuries following confinement, or who desire to consult a physician. Newly born infants not afflicted with contagious diseases are received. Except Sunday, between 12 and 1, midday, members of the Staff are present at the Maternity daily to consult with patients who desire attendance in their homes, or wish to enter the Maternity. Emergency cases and patients in labor are received at any time of the day or night.

**THE STAFF.** The Staff consists of the Medical Director of the Maternity Department of the Jefferson Hospital, Dr. Edward P. Davis; Dr. Stricker Coles, Dr. William H. Wells, Dr. George A. Ulrich, Assistant Obstetricians; Collin Foulkrod, M.D., Francis J. McCullough, M.D., L. Strousse, M.D., H. J. E. Newnam, M.D.; the Obstetric Resident of the Jefferson Hospital, and its Staff of Nurses, with Miss Sarah J. Martin as Chief Nurse, and Miss Mary A. Bartley as Clinic Nurse. In addition to the Jefferson nurses, nursery-maids receive instruction. None but graduate physicians attend patients. Instruction is given to senior students in obstetric clinic, and such students in small groups receive bedside instruction.

**THE OUT-PATIENT DEPARTMENT** of the Jefferson Maternity carries on its charitable work in the lodgings of the poor, among those who cannot enter the wards. Many married women having children cannot go away from home for confinement, and must receive attention in their houses. The Staff of the Out-Patient Department consists of the

Medical Director of the Maternity; Dr. George A. Ulrich, 309 South Twelfth Street, Assistant Obstetrician and Demonstrator of Obstetrics; Dr. Collin Foulkrod, 4005 Chestnut Street, Assistant Demonstrator of Obstetrics; Dr. Francis J. McCullough, 1512 South Tenth Street; Dr. H. J. E. Newnam, 2332 Fitzwater Street; Dr. L. Strousse, 1730 Tioga Street, Instructors in Obstetrics. Members of the Senior Class are allowed to act as assistants to these gentlemen, and the necessary antiseptics and dressings are furnished by the Maternity. A complete outfit of portable sterilizers and instruments for this work is kept at the Maternity under the care of the Clinic Nurse.

**DAILY CLINIC: HOURS FOR ADMISSION:** Daily, except Sunday, from 12 to 1, members of the Staff of the Maternity with the Obstetric Resident are present at the Maternity to advise patients and to arrange for their care during confinement. The Medical Director sees cases referred to him at other hours.

In emergencies, patients may receive needed information at any time, and can at any hour of the day or night secure the services of a physician by personal application, or by communicating with the Maternity. Emergency cases are received at any time, and when necessary an ambulance or a physician will be sent for cases requiring immediate help.

**THE JEFFERSON MATERNITY DISPENSARY.** At 2545 Wharton Street (26th and Wharton) the Maternity Department of the Jefferson Hospital has a Maternity Dispensary. This is in charge of Miss Elizabeth D. Jones, Visiting Nurse. A daily clinic, from 3 to 4 P. M., except Sunday, is held, and advice and help given to pregnant patients, to those who have had children, and to those who wish help in caring for young infants. There are accommodations in the building for two physicians, and two students, acting as assistants to the Dispensary Staff, sleep at the Dispensary to answer night calls and attend cases in the houses of patients.

The Staff of the Dispensary is: Dr. Edward P. Davis, Medical Director; Dr. Collin Foulkrod, 4005 Chestnut Street;

Dr. Francis J. McCullough, 1512 South Tenth Street; Dr. M. C. Grow, Sixtieth and Catharine Streets, Instructor in Obstetrics.

IN-PATIENT AND OUT-PATIENT WORK. The number of cases admitted to the wards of the Maternity varies each year only in proportion with the character of the cases. Where patients are admitted with some serious condition, their convalescence lasts much longer and they occupy space which prevents the admission of other patients. As our space is always in demand, this naturally lessens the number of cases we are able to treat in a given year.

During the past year we have had an unusual number of patients admitted in a serious condition; central placenta previa, infection and injury from repeated attempts at delivery, and cases in convulsions or threatened with convulsions have been brought for our care.

During the past year the number of mothers admitted to the wards of the Maternity was 245, the number of children admitted 28. In the Out-Patient Service, 507 mothers applied for advice or attendance. In the Maternity, 212 children were cared for, and in the Out-Patient Service of the Maternity, 165 children. Total number of patients under the care of the Maternity 1,129.

During the past year 33 operations of various sorts were performed in the Maternity.

In the wards of the Maternity during the past year occurred two deaths; one from eclampsia, died shortly after admission, and one from advanced disease of the heart.

Among the complicated cases which proceeded to recovery were placenta previa, eclampsia, hemorrhage, contracted pelvis, and abnormal positions and presentations.

Among those patients who apply, those who seem in normal condition and who can safely do so, are encouraged to remain at home, being attended by our Out-Patient Staff and Visiting Nurses. Those cases which require especial attention we admit to the wards of the Maternity.

The new sterilizing plant installed by the Trustees, and

MATERNITY DEPARTMENT  
The Nursery

the Nursery remodeled by the Women's Committee have been most satisfactory and enable us to do our work as well as possible in our present cramped and insufficient quarters. Our sterilizing plant provides not only articles needed for the Maternity wards but also for work in the Out-Patient Department. The separate cribs in the Nursery prevent the spread of infection among infants and have proven most satisfactory in making the work of the nursery-maids more efficient.

THE WHARTON STREET DISPENSARY. During the past year, 328 mothers and 422 children received attention at the Wharton Street Dispensary, the total number of patients treated reaching 750.

Among the mothers most of the confinements were normal, and complicated cases were sent to the wards of the Maternity. There was one maternal death. Five infants died, prematurely born.

VISITING NURSES. Miss Elizabeth D. Jones has been Visiting Nurse for the Wharton Street Dispensary since its establishment. Her services are of inestimable value, not only in the medical work of the Dispensary, but in the general good which she does to the people in its vicinity. She is now recognized as the valued friend of those who live about the Dispensary. An idea of her work may be obtained from the fact that during the month of November, 1913, she made 215 calls, in addition to her work at the Clinic.

Miss Laura Pullen on March 1, 1912, went on duty as Visiting Nurse for the Maternity Department of the Hospital. Her work is attended by considerable difficulty because her patients, many of them, are at great distances from the Maternity. She has been received with great pleasure by the patients, and her work has been of great service to the Maternity. During the month of November, 1913, she made 130 calls.

THE LIMIT OF OUR INDOOR WORK. The limited space at our disposal has placed a numerical limit on the indoor work of the Maternity. We are obliged to keep this space, as far

as possible, for complicated and difficult cases, which especially demand hospital care. We are often obliged to refer others whom we should like to assist, to other hospitals. During the past year many complicated and difficult cases have been brought to us by ambulance at the request of outside physicians. Some of them came to the city from a distance by railway, and some of them were fatally ill upon admission. We have been glad to do our utmost for these cases, although we have not succeeded in all instances in saving lives. The faithful work of the House Staff, and especially its nurses, has prevented the spread of infection from any of these patients. To the uniform excellence of the work done within the Maternity must be ascribed the good health of its patients. We have no fixed time for the discharge of patients, and it is not our effort to have the greatest number of confinements possible, but to secure the best possible result in each case. Many of our patients need prolonged care to complete convalescence, because of their debilitated condition on admission. Until our space is increased we are obliged to select only those cases most deserving of our efforts.

The contrast between the high mortality of the Maternity and the low mortality of Out-Patient service shows the difference between normal cases attended in a clean and careful manner, and complicated cases rendered dangerous through inefficient attempts at delivery without suitable aseptic appliances. None of the deaths in the Maternity occurred among patients whose chance for recovery had not been lessened by inefficient treatment before admission.

The Wharton Street Dispensary gave practical instruction to 91 students during the year, who acted as Assistants to the Visiting Staff. Their work was satisfactory to the patients and of great benefit to the graduating class.

The medical work of the Maternity is of benefit and service to the public in four ways:

First, it affords to poor mothers who have unusual complications and diseases during confinement the advantages of modern medical science. One can obtain an idea of how great this benefit is when we remember how serious a matter con-

finement is among the poor, and how especially helpless such women are at this time.

Practical training to physicians in this branch of science is most important. As education advances, the lives and health of patients are benefited thereby.

Practical training for nurses has resulted in a vast improvement in this branch of medicine. One has only to contrast the lack of cleanliness, of thoroughness and knowledge in the old untrained nurses, with the good care of the present day, to appreciate the difference. The Maternity affords unusual advantages for the training of nurses, because it receives so many emergency cases brought by ambulance. Its nurses thus obtain experience not only in usual and normal cases, but in unusual and difficult cases, which makes them especially valuable in assisting physicians in private practice.

THE WORK OF THE MATERNITY FROM ITS SOCIOLOGICAL ASPECT. Our Visiting Nurses have given a new and most valuable impetus to the social work of the Maternity; coming in contact as they do with the poor at times when help is most needed and appreciated, they obtain a personal influence which many others cannot attain. The results of their visits have been most satisfactory and gratifying, and patients have shown their appreciation by uniformly kind and courteous treatment, so soon as the real purpose of the nurse's visits was made known, and often by gifts of carfare, food or whatever the circumstances of the patient permitted. The distrust which foreigners sometimes show, because they do not understand our language, has speedily disappeared when the work of the nurse made evident the purpose of her visit.

They have coöperated with the social workers of the General Hospital, and with various departments of organized charity throughout the city.

Medical training for nursery-maids, like the medical education of nurses, is the substitution of knowledge and discipline for ignorant, haphazard care. As this is the newest field in our work, it is probably the most difficult to develop, but the results have been so far satisfactory.

Good results obtained at the Maternity in a small, overcrowded building, lacking many of the conveniences of modern hospitals, reflects great credit upon the patience and faithful industry of its nursing staff.

EDWARD PARKER DAVIS,  
*Medical Director.*

NURSERY-MAID

## **The Jefferson Maternity Trained Nursery-Maids**

**Founded 1895**

These maids are graduates of a course of four months' training in the Maternity Department. They are admitted to the course only after a careful examination of their characters, dispositions and physical conditions, and must be not less than eighteen years old.

Their training covers the care of infants of all ages, including older children, and requires neatness, absolute cleanliness and obedience, qualities essential in nursery-maids of a higher order.

### **Duties of a Nursery-Maid**

After a nursery-maid has completed her course of training and has been found thoroughly satisfactory in every respect, and fully competent to take charge of a baby or an older child, she is recommended for a position, on the understanding that she will faithfully perform all her duties and conform to the following regulations:

Among her duties will be: The preparation of the baby's food in accordance with written directions from the attending physician, parent or some other responsible person; the care of the child; the care of the bottles; the washing of the baby's flannels and diapers.

She must wear her uniform, consisting of a wash dress, cap, collar, and apron with strings, bib and straps. The color and material of her dress may be that of a Jefferson trained nursery-maid (blue-checked gingham) or white, at the discretion of her future mistress. The uniform is adopted in order to dignify the position, and to show that the maid has completed a course of recognized training.

Absolute neatness and cleanliness of person is required.

She must understand plain sewing and mending.

The nursery-maid shall not leave a place without giving two weeks' notice and can require the same for herself from her mistress.

The nursery-maid, although receiving her training at an authorized training school for nursery-maids, must not forget that she is a maid, though of high class, and must conform to the customs and rules for the maids in the households in which she may be placed, such as eating in the kitchen, taking her day out, etc.

The wages of the nursery-maid shall be twenty-five dollars (\$25) a month, for the first year after leaving the Maternity.

Applications for nursery-maids should be made to a member of the Committee, or to Miss Martin, Head Nurse of the Maternity Department of the Jefferson Hospital, 224 South Seventh Street. If the maid proves satisfactory, a fee of not less than five dollars (\$5) is, at the end of one month, payable to the chairman of the Committee. This fee is for the benefit of the Maternity Department. No fee is charged the nursery-maids.

It is the custom of the Maternity not to give a diploma until a nursery-maid has been one year in private work, and has demonstrated her ability to work successfully in private houses. By this means a record is kept as far as possible. Since April 15, 1904, fifty-one nursery-maids have received instruction. Of these, five have been dismissed as unfit, thirty are on record as working successfully in private houses. Several have married, some have other occupation, and some have not reported since leaving the institution. It is difficult to find reliable and competent young women well fitted for the important and responsible work of caring for young children.

During 1913 there were 92 applications for nursery-maids, and 10 positions filled; 29 young women applied for training; 5 nursery-maids were graduated, and 5 graduated nursery-maids returned for new positions.

Mrs. A. C. Allison, 8 articles of infant's clothing.

Mrs. Harte, 10 articles of infant's clothing.

Mrs. J. W. Clegg, 9 articles of infant's clothing.

Mrs. A. E. DesChamp, 69 articles of infant's clothing.

Mrs. D. M. Barringer, 2 baskets of vegetables.

Mrs. James S. Rogers, 2 baskets of vegetables.

Mrs. Norman MacLeod, papers.

Gimbel Brothers, flowers.

## **The Training School for Nurses**

The Training School for Nurses has been in successful operation for twenty-one years; at no time in its history has the school been more prosperous. The entire organization is under the direction of the Hospital Committee, to which, through the Medical Director, all matters of discipline and curriculum are brought for final consideration. Recognizing that proper teaching of the science and art of nursing can be best accomplished under the supervision of medical men, it has been provided that the course of study be formulated and directed by the Hospital Staff. For this purpose there is appointed annually a Committee of the Staff, known as the Training School Committee, consisting of five members, who outline the curriculum and designate the teachers of the separate branches.

The Directress of the Training School is the executive having immediate charge of the work done by the pupils; she supervises the practical instruction in Wards, Operating Rooms, Diet Kitchen and in classes, for which purposes she is supplied adequate assistance. The Nurses' Home is under her immediate supervision, as is also the home life of the pupils in training and all her subordinates.

### **Course of Study**

The course of study is three years, during which time the Directress of the Training School assigns each pupil, for definite periods, to the various wards and services. Such practical training under skilled superiors best applies the science and most adequately teaches the art. The course of study is modified and improved year by year, always with the idea of betterment. Like all other professional schools, changes are necessary for improvement; to stand still is retrogression. Each year new subjects are introduced or old ones taught in new and, it is believed, better ways. The curriculum embraces a probation term of three months, a junior term of nine months, an intermediate term of twelve months,

and a senior term of twelve months. Practical work is given each nurse in the following:\*

Men's and Women's Medical Wards.....	6 Months
Men's and Women's Surgical Wards.....	6 "
Children's Ward .....	3 "
Roof Garden and special details.....	1 "
Private Corridors .....	4 "
Accident Ward and Dispensaries.....	2 "
Operating Rooms .....	3 "
Maternity Department .....	3 "
Tuberculosis Department .....	3 "
Diet Kitchen .....	2 "

Approximately six months of night duty are given in two or more terms, rarely exceeding three months each, distributed in the above services.

In addition to the above-mentioned practical instruction, the following lectures and demonstrations were given:

### INTRODUCTORY LECTURE

THE MEDICAL DIRECTOR. The Duties, Obligations, and Responsibilities of the Trained Nurse.

### GENERAL MEDICINE

FREDERICK J. KALTEYER, M.D. Fever Nursing. Seven Lectures.

LEIGHTON T. APPLEMAN, M.D. 1. Drugs: Their Proper Names, Sources, and Active Principles. 2. Pharmaceutical Preparations of Drugs, with Their Definition and General Uses. 3. Dosage and Methods of Administering Drugs. 4. Physiological Actions of Drugs. 5. Poisons: The Treatment of Poisoning. 6. Counter Irritation. 7. Hydrotherapy. 8. Antitoxins: Their Uses. 9. Vaccines and Their Applications. 10. Review.

ROSS V. PATTERSON, M.D. 1. Cardiac and Renal Disease. 2. Pulmonary Disease, including Phthisis Fever. 3. Hygiene, Private and Hospital.

---

\* Subject to change without notice. The management at all times reserves the right to make such changes as may seem wise without notice to, or consent of the pupil.

## SURGERY

- WARREN B. DAVIS, M.D. 1. Hemorrhage, Wounds and Burns. 2. Shock: The Treatment of Shock. 3. Bites of Dogs, Insects and Snakes. 4. Drowning, Asphyxia, First Aid to the Injured. 5. Operations and Subsequent Complications.
- HUBLEY R. OWEN, M.D. 1. Fifteen Lectures and Demonstrations on Bandaging.
- DUNCAN L. DESPARD, M.D. 1. Fractures. 2. Dislocations and Sprains. 3. Anesthesia.
- JAMES R. MARTIN, M.D. 1. Solutions (Two Lectures). 2. Post-Operative Nursing (Three Lectures).

## ANATOMY

- E. J. KLOPP, M.D. 1. General Survey of Anatomy as it should be understood by Nurses. 2. The Skeleton. 3. The Muscles. 4. The Circulatory and Respiratory Systems. 5. The Alimentary System. 6. The Region of the Head and Neck. 7. The Region of the Thorax. 8. The Region of the Abdomen. 9. The Region of the Pelvis. 10. The Nervous System.

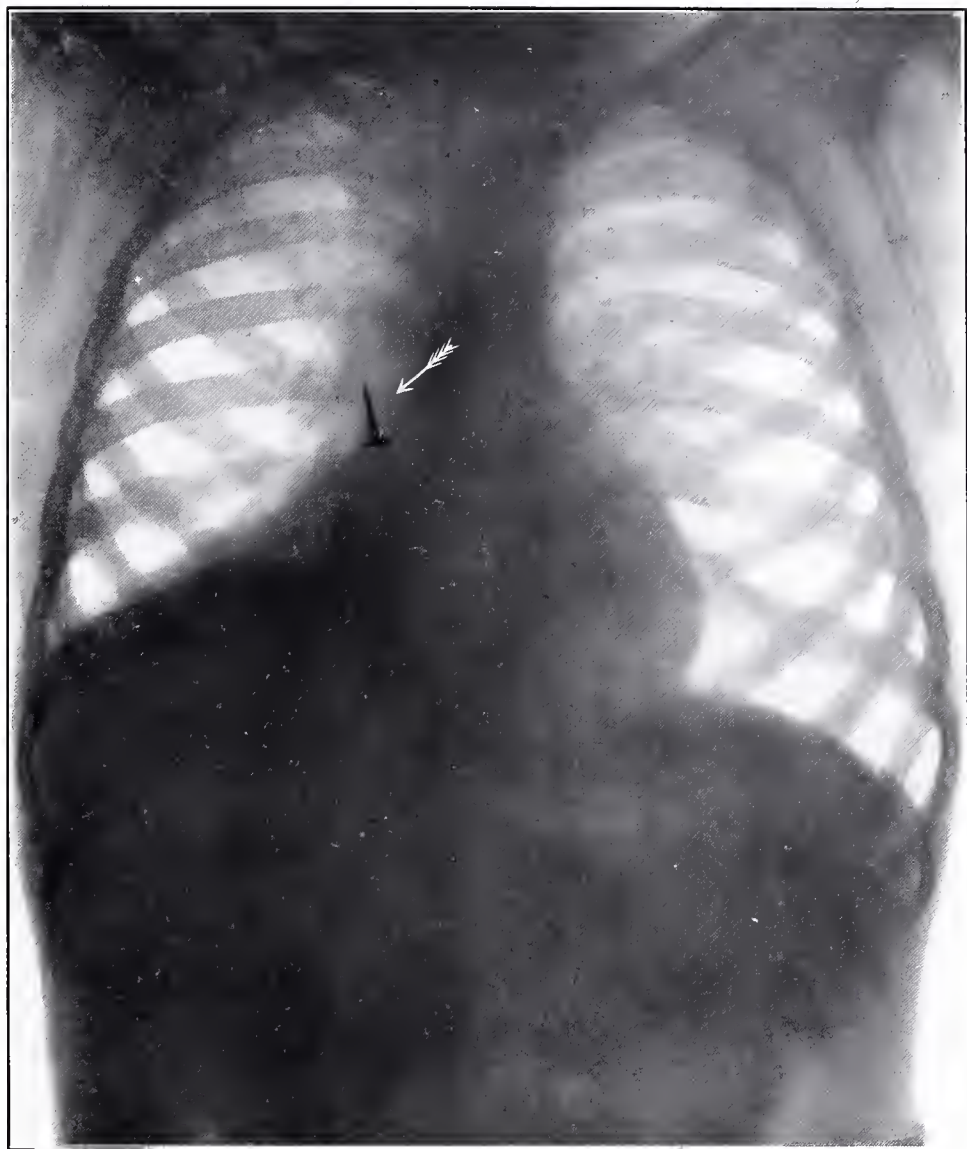

## PHYSIOLOGY

- E. J. KLOPP, M.D. Course in Physiology. Twenty-two Lessons.

## OBSTETRICS

- PROF. EDWARD P. DAVIS, M.D. 1. Obstetric Nursing in Private Houses; Complications of Pregnancy, Abortion, Eclampsia, Hemorrhage. 2. Signs and Symptoms of Labor; Preparation of the Patient and Her Room; the Duties of the Nurse during Spontaneous Labor.
- COLLIN FOULKROD, M.D. 1. Obstetrics and Antisepsis and Asepsis; Signs, Symptoms and Treatment of Post-Partum Hemorrhage. 2. Duties of the Nurse During Obstetric Operations; the Sterilization of Instruments, Dressing, Field of Operation, Operating Tables, the Posture of the Patient; the Anesthetist; Shock and Hemorrhage.
- GEORGE A. ULRICH, M.D. 1. The Normal Puerperal State. 2. Complications arising during the Puerperal State for Mother and Child. 3. The Infant, its Food and Dress. 4. Bathing, Exercise, Development and Weaning.

TACK IN BRONCHUS  
Operation and Recovery

## **GYNECOLOGY**

PROF. E. E. MONTGOMERY, M.D. 1. Consequences and Sequelæ following Abdominal Operations.

JOHN M. FISHER, M.D. 1. Abdominal Operations.

P. BROOKE BLAND, M.D. Medical Gynecological Nursing. Nursing in Vaginal Operations. Three Lectures.

ALFRED HEINEBERG, M.D. 1. Anatomy of the Pelvic Organs; two Lectures.

## **BACTERIOLOGY AND HYGIENE**

PROF. RANDLE C. ROSENBERGER, M.D. 1. General Distribution of Bacteria and Method of Bacterial Action in Different Diseases. 2. Epidemics of Disease due to Water, Milk and Carriers. 3. Toxins and Method of Obtaining Antitoxins and other Sera; Vaccines. 4. Rôle of Insects in Propagation of Disease. Dangers of Dust; Occupation Diseases. Disinfection by Steam, Hot Air, Chemicals.

## **DISEASES OF THE NERVOUS SYSTEM**

GEORGE E. PRICE, M.D. 1. Nursing in Organic Nervous Diseases. 2. Nursing in Insanity. 3. Nursing in Functional Nervous Diseases.

WILLIAM J. DUGAN, M.D. 1. Electricity and Electro-Therapeutics. 2. Application of Electricity in Nervous Diseases.

## **DISEASES OF THE EYE**

PROF. HOWARD F. HANSELL, M.D. 1. Anatomy of the Eye.

PROF. WILLIAM M. SWEET, M.D. 1. Nursing in Diseases of the Eye.

## **DISEASES OF CHILDREN**

PROF. E. E. GRAHAM, M.D. 1. Gastro-Intestinal and Pulmonary Diseases. 2. Nursing in Infectious and Contagious Diseases.

CLARENCE W. MCCONIHAY, M.D. 1. Bathing, Clothing, Sleep, Exercise, Weight.

JOHN D. CURRAN, M.D. 1. Feeding of Infants and Children; Preparation of Foods.

## **ORTHOPEDIC SURGERY**

PROF. H. AUGUSTUS WILSON, M.D. 1. Care of the Feet; Correct Walking.

ARTHUR J. DAVIDSON, M.D. 1. Nursing in Joint Diseases. 2. Preparation and Application of Plaster Bandages.

## DISEASES OF THE THROAT

PROF. D. BRADEN KYLE, M.D. 1. The Care of Accident Cases and of Surgical Procedures involving the Nose and Larynx.

## DISEASES OF THE EAR

E. L. KLOPP, M.D. 1. Nursing in Diseases of Middle Ear and Mastoid arising from Acute Infectious Diseases.

## DISEASES OF THE SKIN

H. K. GASKILL, M.D. 1. Anatomy of the Skin. 2. Suggestions on the Care of Diseases of the Skin.

## GENITO-URINARY DISEASES

PROF. HIRAM R. LOUX, M.D. 1. Nursing in Venereal Diseases; Methods to be Adopted in Order to Prevent Contagion. Urethral Instruments; Care, Sterilization and Uses of. 2. Retention of Urine; Causes, Symptoms and Treatment. Uremia; Causes, Symptoms and Treatment. Hematuria; Causes, Treatment. Catheterism.

J. R. MARTIN, M.D. 1. Normal Urine. 2. Deviations from the Normal to be Noted by the Nurse. 3. Proper Method for Collecting Samples for Examination. Simple Emergency Tests.

Recitations and demonstrations, including practical bedside work, were given by the Directress and her assistants and by Miss Corbin, Instructor in Massage, as follows:

Recitations from assigned lessons,	
Practical Nursing .....	24 hours
Materia Medica .....	15 "
Obstetric Nursing .....	5 "
Fever Nursing .....	20 "

Demonstrations,	
Massage .....	20 "
Dietetics .....	14 "

During the year just ended twenty-two nurses completed the course, graduating at Commencement held on May eighth. The number of graduates is now two hundred and ninety-six.

During the year 533 inquiries were received; 50 applicants were not eligible, and 480 application blanks were sent. The school census follows:

Pupil nurses and probationers, June 1, 1912.....	97
Graduated .....	22
Resigned and rejected .....	42
Admitted .....	60
Pupil nurses and probationers, May 31, 1913.....	93

### **Nurses' Home**

The Nurses' Home, in addition to the dormitories, provides recitation, recreation, reading and reception rooms. Under proper regulations nurses are permitted to see and entertain their friends, enjoy social evenings, and every effort is made to secure something of home life and the pleasures of congenial companionship. A Committee of the Women's Auxiliary regularly visits the Home, provides comforts, and looks after the general welfare of the pupils. The social features of last Commencement were entirely under the direction of the Nurses' Home Committee of the Women's Auxiliary, to whom all were indebted for a most enjoyable occasion.

A Register of the Graduates of the Nurses' Training School is kept in the office of the Directress, and nurses are supplied on application by telephone, mail or in person. Alumnæ are requested to keep the Directress informed as to their addresses, and whether engaged in or desiring private or institutional nursing or administrative work.

Applicants for admission to the Training School should call upon or address the Directress of the Training School for Nurses, Jefferson Hospital.

W. C. T. U. Flower Mission, flowers.

Wright, Tyndale and Van Roden, Chinese umbrella jar.

## **Gifts by Will**

In the State of Pennsylvania, testamentary provision for a charitable institution must be by a will made at least thirty days prior to the decease of the testator. The signature of the testator must be attested by at least two subscribing witnesses, who should sign their names as witnesses thereto in the presence of the testator and of each other.

None of these witnesses should be interested in any manner in the institution intended to be benefited, as manager, trustee, officer, employee, beneficiary or otherwise.

The testator may either bequeath personal property or devise real estate to the institution generally, or may create an endowment whereby only the income therefrom shall be used for its benefit.

The following forms are suggested for a legacy of personal property and a devise of real estate, where it is intended that the same shall be devoted to the use of the Hospital generally without restriction:

### **FORM OF BEQUEST OF PERSONAL ESTATE**

I give and bequeath unto THE JEFFERSON MEDICAL COLLEGE, of Philadelphia, for the maintenance, extension or betterment of its Hospital Department, the sum of..... dollars.

### **FORM OF DEVISE OF REAL ESTATE**

I give and devise unto THE JEFFERSON MEDICAL COLLEGE, of Philadelphia, its successors and assigns, for the maintenance, extension or betterment of its Hospital Department (here describe the property).

If the testator shall desire to limit the use of the legacy or devise to a particular purpose, the following forms are suggested. Such purpose can be indicated by suitable designation to be added after the words "Hospital Department."

### **FORM OF BEQUEST OF PERSONAL PROPERTY**

I give and bequeath unto THE JEFFERSON MEDICAL COLLEGE, of Philadelphia, for the benefit of its Hospital Department (here indicate the purpose) the sum of..... dollars.

### **FORM OF DEVISE OF REAL ESTATE**

I give and devise unto THE JEFFERSON MEDICAL COLLEGE, of Philadelphia, its successors and assigns, for the benefit of its Hospital Department (here indicate the purpose) (here describe the property).

If the testator shall desire that the legacy or devise shall create or form part of an endowment for a general or a special purpose, and only the income thereof be used for the benefit of the Hospital, the following forms may be found helpful. The purpose desired can be added after the words "for the endowment of."

### **FORM OF BEQUEST OF PERSONAL PROPERTY**

I give and bequeath unto THE JEFFERSON MEDICAL COLLEGE, of Philadelphia, the sum of.....dollars for the endowment of

### **FORM OF DEVISE OF REAL ESTATE**

I give and devise unto THE JEFFERSON MEDICAL COLLEGE, of Philadelphia, its successors and assigns (here describe the property) for the endowment of

Among the purposes for which endowments are desired are the following:

- Hospital Department.
- Rooms in the Hospital.
- Any of the Wards of the Hospital Department and beds therein.
- Maternity Department of the Hospital and rooms, wards and beds therein.
- Children's Department of the Hospital and beds therein.
- Social Service of the Hospital Department.
- Operating Rooms in the Hospital.
- Laboratories in the Hospital.
- Departments of Research in the Hospital.
- Dispensaries in the Hospital.
- Building Fund of the Hospital.

If the testator shall desire to benefit the Hospital Department and to limit the use of the legacy or devise to a particular purpose, the following forms are suggested:

**FORM OF BEQUEST OF PERSONAL PROPERTY**

I give and bequeath unto THE JEFFERSON MEDICAL COLLEGE, of Philadelphia (Hospital Department) (here indicate the purpose), the sum of.....dollars.

**FORM OF DEVISE OF REAL ESTATE**

I give and devise unto THE JEFFERSON MEDICAL COLLEGE, of Philadelphia, its successors and assigns (Hospital Department) (here indicate the purpose) (here describe the property).

If the testator shall desire that the legacy or devise shall create or form part of an endowment for a general or a special purpose, and only the income thereof be used for the benefit of the Hospital, the following forms may be found helpful. The purpose desired can be added after the words "for the endowment of."

**FORM OF BEQUEST OF PERSONAL PROPERTY**

I give and bequeath unto THE JEFFERSON MEDICAL COLLEGE, of Philadelphia (Hospital Department), the sum of .....dollars for the endowment of

**FORM OF DEVISE OF REAL ESTATE**

I give and devise unto THE JEFFERSON MEDICAL COLLEGE, of Philadelphia, its successors and assigns (Hospital Department) (here describe the property), for the endowment of
